Yarn

How to use Yarn?

Yarn is to describe by crocheting, knitting, and weaving patterns. For example, knitting has two needles like you are holding chopsticks. Crocheting has a hook, it may look similar to the Rainbow loom hook. Here are some knitting and crocheting patterns.

Knitting makes patterns by using two needles to form the loops, moving a set of loops from one needle to another. It normally has two basic stitches, one is knit and one is purl. Below are few samples of knitting patterns.
